EYESRHYTHM · START HERE

EyesRhythm for Windows

How to install this copy

1. This PDF is not the app. It is only these steps. Your license key is in the same purchase email.

2. Download the Windows installer from Google Drive. Click Download EyesRhythm for Windows or paste this address into your browser:
https://drive.google.com/file/d/1L3UdbNhzzGyhEphri-nl4wHehDXTEQPu/view?usp=sharing
Save **EyesRhythm-Setup-1.3.0.exe** (this is the installer, not a zip). If Google asks you to sign in, email hello@eyesrhythm.com.

3. Right-click the **.exe** → Properties → tick **Unblock** → Apply, if Windows shows that box.

4. Double-click the Setup file. You do not need an administrator account. If Windows shows “Windows protected your PC”: **More info** → **Run anyway**.

5. Finish the installer. Open EyesRhythm from the Start menu. Paste the **license key** from this email and click **Activate**. Stay online this once. After that, EyesRhythm stays on this computer.

6. When Windows asks for the camera, click **Allow**. Later: Settings → Privacy & security → Camera → allow desktop apps, then allow EyesRhythm. Close Zoom, Teams, or any browser tab using the camera first.

This key is for Windows on one computer. It will not unlock the Mac copy.

Need help? Email hello@eyesrhythm.com from the address you used at checkout. Camera setup:
