EYESRHYTHM · START HERE

EyesRhythm for macOS

How to install this copy

1. This PDF is not the app. It is only these steps. Your license key is in the same purchase email.

2. Download the Mac installer from Google Drive. Click Download EyesRhythm for macOS or paste this address into your browser:
https://drive.google.com/file/d/1BTVMSQ6OCXOvIch8FsmO4FxIK4iSuKYE/view?usp=sharing
Save **EyesRhythm-1.2.1.dmg** (this is the app, not a zip). If Google asks you to sign in, email hello@eyesrhythm.com.

3. Double-click the **.dmg**. Drag EyesRhythm into the **Applications** folder. Eject the disk image.

4. Open Applications and double-click EyesRhythm. If macOS says it cannot be opened because it is from an unidentified developer: Control-click EyesRhythm → **Open** → **Open**. You only do this once.

5. Paste the **license key** from this email and click **Activate**. Stay on Wi-Fi this once. After that, EyesRhythm stays on this computer.

6. When macOS asks for the camera, click **Allow**. Later: System Settings → Privacy & Security → Camera → EyesRhythm. Close Zoom, Teams, or any browser tab using the camera first.

This key is for macOS on one computer. It will not unlock the Windows copy.

Need help? Email hello@eyesrhythm.com from the address you used at checkout. Camera setup:
